Subject: Juneau and Wood county Private Well data

Hi All:

I spoke to Matt Komiskey, Juneau County Land and Water Conservation to ask him a few questions about the 104 private wells tested in Juneau and Wood Counties:

1. Matt has shared the information including the locations with Bruce Rheineck, Wisconsin DNR.
2. I asked that when Matt Komiskey and Juneau and Wood counties collected the samples did they record who was on filtration systems. Matt stated that they asked, so that they would know where to sample, but he did not think they recorded the information. Matt did say that a lot (not clear of the %) of the homes did not have filtration systems that they tested.
3. I asked who did what work in the project of the sampling of the 104 private homes: Juneau County Land and Water conservation and Juneau and Wood counties Health Departments collected the samples from the home all in one day – May 30, 2018. UW Stevens Point analyzed the samples, and the Central Wisconsin Groundwater Center an extension of UW Stevens Point mapped the data.

If you have any other questions regarding the Juneau and Wood counties private well data, please let me know.

Sincerely,

Cheryl Burdett
